Longitudinal Structural Equation Modeling: A Comprehensive Introduction, Second Edition
Jason T. Newsom
Corrections and Clarifications for Second edition

p. 38, Figure 2.1. Figures 2.1b and 2.1c are switched. As depicted, 2.1b shows strict invariance and 2.1c shows strong invariance.

p.92, top paragraph. The degrees of freedom for the two reported chi-square values are 45 and 43 respectively.

p. 166, third to last line. β_{y3m3} = -.358 rather than -.463

p. 299, Figure 9.5. The figure does not depict the covariance of y_1 with x_2 through x_6 but these parameters were estimated in the model. Also, there is astray value of 1 in upper right of Figure 9.5(b).

p. 332, first full paragraph. The last decimal place in the aBIC values is incorrect. The correct value is 145,027.765.
